## DETAILED ACTION

### *Reasons for Allowance*

1. Claims 1- 20 are allowed.
2. This is examiner's statement of reasons for allowance.

Regarding claims 1-15, 19 and 20 the prior art either singularly or in combination does not teach a document reading apparatus comprising: a light source drive controller that includes a pulse generating unit for generating a plurality of control pulses having a period that is shorter than an accumulation period of the linear image sensor, the accumulation period being indicated by a timing signal that represents the accumulation period and a non-accumulation period, and a synchronization output unit for outputting a prescribed number of trigger pulses that are in synchronization with the timing signal and the control pulses and a light source driver that is arranged to drive the light source in response to the trigger pulses.

Regarding claim 16, the prior art either singularly or in combination does not teach a document reading apparatus comprising: a light source positioned parallel to one side of a document to irradiate light on the document, a positional relation between the document and the light source being mechanically changeable so that an irradiated area on the document moves along the other side of the document and a light source drive circuit arranged to control an on/off time of the light source to be shorter than a time obtained from dividing an accumulation period of the linear image sensor by a value  $m$  ( $m > 1$ ) in order to alter an exposure light level of the linear image sensor.

Regarding claims 17 and 18, the prior art either singularly or in combination does not teach a document reading apparatus comprising: "...a light source drive circuit that is arranged to

control a number of the high voltage high frequency pulses supplied to the light source within one accumulation time of the linear image sensor in order to alter an exposure light level of the linear image sensor.”

The features identified, in combination with other claim limitations, are neither suggested nor discussed by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
